Oktober, 01. 2020

MB Maschinen GmbH is proud of its 30th company anniversary. And rightly so! Not every company can happily claim that.

Biebergemünd / Hessen, October 1st, 1990: The hour of birth. Since then, numerous new technical processes have been developed and a large number of products have been developed and refined.

Even after 30 years, the company with Wilfried Geis as managing partner still shows no signs of "Old age fatigue" or stagnation. MB looks back with pride on the experience it has gained over the past few years, is right on trend and looks ahead with new developments, ideas and future plans.

In 1990 MB Maschinenhandel started with the distribution of EDM machines (spark erosion machines). Then EDM drills and small EDM countersinks were developed and manufactured. Special machines in the field of EDM and handling are still developed according to customer specifications.

The company philosophy is always the same: "Departure for new achievements". In order to live up to this principle, the company has steadily grown beyond itself.

In January 2008 the company moved into the new premises in Biebergemünd-Bieber. The available space of over 500 m<sup>2</sup> for planning / construction, production and machine demonstrations ensure a good production process.

The next milestone in the company's history was an agreement with a Chinese partner, the WINTOP Corporation. Effective synergies in the production area are thus utilized.

This cooperation enabled the development and production of highly efficient 5-axis milling machines and milling-grinding machines for the dental sector. Since standstill means regression, traditional EDM drilling machines are also constantly being optimised.

## Maschinen GmbH

MB Maschinen GmbH with its partner WINTOP Corp./China is now one of the most important manufacturers and dealers for EDM machines and high-performance milling machines for the dental sector in Europe and worldwide.

The company has always been a serious and reliable partner for its customers, convincing them with its efficiency and professional competence in solving problems and handling even complex projects.

A trained service team ensures the reliable operational readiness of the machines, which also works out solutions to problems on site with the customer and offers a helping hand with advice. Fast and flexible customer service is a top priority for the company.

In July 2017, the company's quality management was certified to DIN ISO 9001:2015 for the first time; the re-certification was successfully completed in July 2020.

Numerous satisfied and long-standing customers rely on the cooperation with MB Maschinen GmbH. The broad customer base ranges from large automotive groups, tool and mould makers, Aviation industry suppliers to dental laboratories and dentists.

Thanks to the highest quality standards, MB Maschinen GmbH has now been active on the market for 30 successful years and is not yet at the end of the line. According to the managing partner Wilfried Geis, the same applies to the future:

"Size is not the only criterion for economic success. Today and in the future it is more important than ever to work intelligently and efficiently."

And to create good prospects for the future of the company!
